

OPERATING INSTRUCTIONS
FOR
GIANT-TRAIL-VAC MODELS
888 - 898 - 1010 - 888MO - 898MO - 1010 MO

Your Giant-Trail-Vac comes complete in one crate, assembled with the necessary parts, with the exception of the Mower Attachment Kit which comes in a separate box.

Inspect your unit for any damage that might have occurred in shipping. If any is found, save the packing container and IMMEDIATELY notify the transport carrier who delivered your machine as he is responsible for the damage and is the only one to make any adjustments. Before leaving our plant, all components were completely inspected. All manufacturing dimensions are held to close tolerances, and thus, you will have little difficulty in assembling your Giant-Trail-Vac if you follow these steps.

MOTOR INSTRUCTIONS: You have received a complete engine manual with your machine. Especially note instructions on OILING. Fill out the warranty card immediately and send it to the engine manufacturer, as directed. Engines are warranted by the engine manufacturers and not by Giant-Vac. Consequently, if any difficulties exist, please contact them rather than us as much time will be saved as they would be the only ones to make any adjustments. If you will check the yellow pages in your telephone directory, you will find the local engine servicing dealer.

<p>CAUTION <u>ROTATING FAN</u> BEFORE MAKING <u>ANY ADJUSTMENTS</u> OR REPAIRS STOP ENGINE AND REMOVE SPARK PLUG WIRE. WHILE IN OPERATION KEEP ALL PARTS OF BODY AWAY FROM INTAKE AND EXHAUST SECTIONS.</p>

TRAILER BED: Your Giant-Trail-Vac has about 2 cubic yard trailer. The trailer will self-dump. When trailer is full, back trailer to the dumping yard. Take off the two back door catches and pick up back door and the debris will come out. Grease the trailer wheels every eight hours of operating the unit.

OPERATION: Your Giant-Trail-Vac is quite universal and has many attachments available. The most popular of these are as follows:

1. Direct mounted pick-up nose cones.
2. Rotary Mower attachments which fasten to the discharge side of garden tractor.
3. Hose Attachments.

NOSE CONE: The nose cone is mounted on the power unit and has two rubber flaps. It can be easily raised or lowered by loosening two bolts and sliding the flap by means of the adjustable slots provided. The height of the flaps depends upon the particular application. In essence, the back flap should be touching the surface.

GIANT-TRAIL-VACS.

ROTARY MOWER ATTACHMENTS: Giant-Vac manufactures a number of special attachments, custom-designed to fit on the rotary mowing attachments of many leading garden tractors. This kit consists of a special suction hood to be fastened to the discharge chute of the rotary mowers, a five foot length of 6 inch hose, and a six inch flange to bolt on to the front of the power unit. A hitch, specially designed for the individual make of the tractor is also supplied. In most instances, these are designed to bolt directly on to your individual tractor, and consequently, you do not have to drill any holes. The two piece hitch is necessary in order to "close couple" the trail-vac which is important for making turns when using these attachments.

HOSE CONNECTIONS: Hose kits consisting of a flange to bolt on to the power unit, a 10 foot length of hose and a nozzle to fit on the end of the hose are available. These can be had from 4 to 8 inches in diameter. The most popular size is 6 inches. These have many applications. Probably, the most important is to clean out such places as shrubbery beds.

HOSE KIT FOR NOSE CONE: This kit is bolted on to the front of nose cone. It has a 6" x 10' intake hose with nozzle. To operate hose kit, push arm on nose cone. When flap is closed, nose cone will not operate and all air is directed to the hose.

WARRANTY:

Within 90 days from the purchase date, Giant-Vac Mfg., Incorporated will replace free of charge for the original purchaser, any part or parts returned to our factory at South Windham, Connecticut and found by us to be defective in material and/or workmanship.

The filter screen is an expendable item and therefore, cannot be guaranteed.
